SUMMARY

Full-Stack Developer with foundation in JavaScript, TypeScript, HTML, CSS, focused on building intuitive, user-friendly web applications and creating responsive, scalable, and maintainable solutions while continuously learning, solving complex problems, and expanding my technical skills

SKILLS

Languages	JavaScript · PHP · JSON · TypeScript
Frontend	HTML · CSS · React.js · Tailwind.CSS
Backend	Node.js · Express.Js · PHP · Laravel ·
Datatabases	MySQL · MongoDB
Tools	Git · GitHub · VS Code · Postman · Docker · GCP

EXPERIENCE & PROJECTS

Junior Full Stack Developer Intern (PHP) – IT Academy April 2026 – June 2026

[IT Academy], [Barcelona]

- Collaborated with backend and frontend developers to develop and maintain an existing website.
- Used Figma mockups as design references when implementing website features.
- Participated in two-week Scrum sprints, including task planning, daily stand-ups, and sprint reviews.
- Implemented new functionalities and created and executed automated tests to ensure code quality and reliability.
- Tech stack: PHP, Laravel, JavaScript, TypeScript, React.js, Figma, Scrum, Testing

Full Stack Developer - Midori January 2026 - March 2026

[IT Academy], [Barcelona]

- Developed a RESTful API using Laravel for an e-commerce platform
- Implemented authentication and role-based access control using Laravel Passport
- Built a client-server architecture integrated with a relational database
- Developed frontend using React and TypeScript
- Tech stack: Laravel 12, PHP, MySQL, Laravel Passport, Docker
- 🔗Midori-Backend
- 🔗 Midori-Frontend

Full Stack Developer - Mindcode February 2025 - May 2025

[Barcelona]

- Developed a full-stack educational platform using React, Node.js, JavaScript, MySQL, and MongoDB, providing AI-assisted programming support for students.
- Designed and implemented RESTful APIs for AI interactions, quizzes, user management, classes, enrollments, languages, restrictions, and statistics.
- Integrated AI-powered programming assistance with contextual prompts and an automated quiz system generated from students' previous interactions.
- Implemented CI/CD with GitHub Actions, automating production deployments and managing sensitive configuration through environment variables and GitHub Secrets.
- Containerized the application with Docker, separating frontend, backend, MySQL, and MongoDB services.
- 🔗 Mindcode

FRONTEND DEVELOPER INTERN February 2025 - June 2025

[Myllox], [Barcelona]

- Developed responsive web interfaces based on provided mockups using HTML, CSS, JavaScript, and Bootstrap 5
- Collaborated in an Agile development environment using the Kanban methodology to organize tasks and track progress.

ETL PIPELINE

[Barcelona]

- Built an end-to-end ETL pipeline on Google Cloud Platform using Python, Apache Airflow,
- Cloud Composer, and Cloud Data Fusion
- Generated and processed synthetic employee datasets using Faker and automated CSV
- uploads to Google Cloud Storage (GCS)
- Designed Airflow DAGs to orchestrate daily extraction and transformation workflows
- Triggered Cloud Data Fusion pipelines for downstream ETL processing
- Implemented a production-style cloud data engineering workflow using GCP-managed
- services
- 🔗 ETL-Project

EDUCATION

Diploma in Desarrollo de Aplicaciones Multiplataformas (DAM) September 2023 - June 2025

Diploma in Sistemas Microinformatics i xarxes (SMIX) September 2021 - June 2023
